HAROLD STEARNS

Gladiolus Hobbyist-Grower

21 North Second St.

ESTHERVILLE - IOWA

Featuring VARIETIES OF MERIT FOR
DEPENDABLE PERFORMANCE

Soliciting Growers good will and satisfaction
rather than voluminous sales

To All Gladiola^{US} Growers Everywhere. Greetings:

I wish to take this opportunity to thank the many of you for your nice letters of appreciative acknowledgment, sorry that circumstances did not always permit my prompt replying at the time of their receipt, hope that all of you may have had a very successful growing season and trust that our future dealings may be transacted with the same feeling of cordiality as in the past. We shall continue the policy of trying to send out only healthy stock, true to name and size. Any transaction in which the customer should not be entirely satisfied with after receiving their order, purchase price will be refunded to them if they will return stock to us. There are many meritorious varieties grown for sale which we do not list. Our present offering consists of several of the older ones that are good including such newer ones which we have had the opportunity to try out over a period of time enough that we may know they are capable of dependable performance. We offer none for sale which we do not think worthy of culture. We appreciate all orders, yet all should realize the impossibility of any one individual dealer's ability to supply too great a demand from the supply of Gladiolus stock at the present time. Suggestions covering culture will be included with all orders. Regardless of whence you may receive anticipated plantings from, we wish to all of you, "Happy growings."

BULB SIZES

Bulbs are herewith classified as being L. for large, M. for medium and S. for small. Large sizes are No. 1's (over 1½ inches) and No. 2's (from 1¼ to 1½ inches in diameter.) Medium sizes are No. 3's (between 1 and 1¼ inches) and No. 4's (between ¾ and 1 inch in diameter). Small are No. 5's (between ½ and ¾ inches) and No. 6's (which are under ½ inch in diameter). A very good illustrated cut of bulbs drawn to these dimensions can be found in the May, 1945 issue of the "Flower Grower." In making up orders we attempt to make an equal representation as between those requested sizes as far as possible. Planting large size bulbs is no positive indication that you will get the largest size bloom possible for that specific variety, unless one is sure of the age of the bulb being planted. One may find large size bulbs on the market which have passed their maximum flowering ability—this life cycle in gladiolus bulbs average about 7 years. Adverse opinion as to the SIZE of planting stock needed to produce good bloom notwithstanding, small size bulbs in many varieties will make good flower spikes, if from young vigorous stock. Our entire listing consists of bulbs the first and second year from bulblets.

TERMS AND PRICES

Minimum orders accepted—\$2.00, which will be prepaid in the U. S., however, if you will advise me to send your order charges collect, I will include more than enough extras in your order to compensate you for having paid the carrying charges. Express shipments are by far the safer way during severe weather conditions. Please do not ask for orders after May 1st. All stock subject to prior sale. My stock is Iowa State inspected, Certificate No. 125.

DISCOUNT

Many dealers offer a certain discount on different sized orders and some also to those who may send in their orders before a certain date. It is our policy to make the original price listing as low as possible regardless of the size of order above minimum without any discount inducement, therefore we offer no cash discount. We do, however, aim to make up any difference in price for specific varieties we may find to be listed at a lower price by others by adding extras of such when ordered. To those of you who may express your willingness to pay carrying charges on your orders we will add more than enough extras to your order to make up the difference to you.

WHOLESALE

While we are not including a wholesale offering in this listing—we do have enough in some sizes of several varieties, and especially small size planting stock—4-5-6's and bulblets—in nearly all to do so. To those of you who may wish to order in quantity at wholesale, if you will write concerning the specific varieties you may be interested in that may be listed herein, we will attempt to supply you at the right price if possible to do so.

CULTURE

We include cultural directions for the benefit of the uninitiated with all orders sent out. Much experimental work is being done with new formulas for dips and sprays. The following for each are among those methods which have proved generally satisfactory for the average grower up to this time:

BULB DIP—highly effective for bulb disease and thrip bulb infestation. One gallon mixture—1¼ table or 3 teaspoons LYSOL. Three gallon mixture—4 tablespoons Lysol. Use 1 teaspoon of spreader to each gallon if obtainable. Soak bulbs 3 to 6 hours, bulblets 12 to 14 hours (overnight) shortly preceding planting. Same dip may be used for about three separate times if solution is not kept too long.

THRIP SPRAY. Mix well and spray thoroughly weekly after foliage is about four inches high until just before blooming period.

2 level tablespoons TARTAR EMETIC

4 level tablespoons brown sugar to each 3 gallons of water.

GENERAL PRICE LIST

Please order just as listed and do not break amount in each item. Color and size classification according to the latest listing of the North American Gladiolus Classification Committee—1945. In ordering please give second choice where possible.

SALBACH'S PATENTED GLADIOLUS

I have been authorized to sell the following by Mr. Carl Salbach of Berkeley, Calif., which are under protection of U. S. Patents. Those who may buy them do so with the agreement that they will not resell the bulbs nor the bloom from them.

GOLDEN GODDESS. Clear deep yellow. 10-L. bulbs \$1.00. 10-M., 80c.

JUNE BRIDE. Large cream. Large 50c. 3, \$1.25. Medium, 35c. 3-90c.

SIR GALAHAD. Large cream. Large, 35c. 3, 90c. Medium, 25c. 5-\$1.00.

We believe that all who grow Gladiolus may benefit by belonging to Gladiolus Societies, very representative of which is our "New England Gladiolus Society" of which Mr. Albin K. Parker, Box 2, Norwood, Mass., is Secretary. Supplement Membership in this costs \$2.00 per year, which entitles one to the yearbook, "The Gladiolus" issued shortly after the first of the new year, together with additional supplements published at intervals during the year containing current information, seasonal articles, reports and news from affiliated State Societies, etc.

SPECIAL COMBINATION SIZE OFFER

The different bulb size items listed below are offered at 11 items for \$5.00—(Minimum order accepted). Not more than one duplicate item with each total minimum of 11, please; however, additional separate items may be selected at 50c each or total of 23 may be ordered for \$10.00 which may include two duplications should you wish. All bulbs and/or bulblets listed after each named variety constitute an item.

The following letter—a specimen of many such we have on file:

OKLAHOMA
AGRICULTURAL and MECHANICAL COLLEGE

School of Agriculture
Department of Agricultural Education

STILLWATER

January 6, 1945.

Mr. Harold Stearns
Estherville, Iowa.

Sometime ago I received the gladiolus bulbs which I ordered. I intended to write you before stating that yours were the finest bulbs I have ever received from anyone, and I have been ordering them since 1923. They were clean, healthy and came through in good shape.

Sincerely,

(Signed) C. L. ANGLER,
Teacher Trainer, Agricultural Education.

Gladiolus Hobbyist-Grower

Other variety—same color..... Other variety—equal quality.....
